

DESlock⁺

Data Encryption

 TECHNOLOGY ALLIANCE

DESlock+ is a simple-to-use encryption application for companies large and small. Take advantage of the optimized setup that speeds up the time to adoption for admins. The client side requires minimal user interaction, increasing user compliance and the security of your company data.

Client side

Data is a critical part of every organization, but this most valuable asset often poses a huge risk when it travels or is transmitted beyond the corporate network. Full disk and removable media encryption protect laptop computers against the unexpected. File, folder and email encryption allow fully secure collaboration across complex workgroups and team boundaries, with security policy enforced at all endpoints by the **DESlock+** Enterprise Server. Meet your data security compliance obligations with a single MSI package.

Full Disk Encryption

Encrypt only disks and partitions you want
Transparent pre-boot security using FIPS 140-2 validated, 256 bit AES Encryption
Encryption may be started and managed remotely
Remote user-password recovery
Enhanced workstation screening prior encryption, including Safe Start mode
Fully compatible with Microsoft Windows 8 and 8.1, with support for UEFI and GPT

Removable Media Encryption

No extra space is reserved for encrypted content and the whole device capacity can be used by user
Policy driven encryption includes DESlock+ Go, on-device software for use on unlicensed systems
Works with any USB drive, CD & DVD media

File & Folder encryption

Encrypt only files and folders you want
All files moved to encrypted folder are encrypted immediately

Email Encryption

Transparent email encryption for Outlook through a dedicated plugin
The email can be decrypted only by recipients who share the same key as sender
Text and clipboard encryption works with any e-mail client, including webmail

DESlock+ Data Encryption

Desktop	Personal Edition	Essential Edition ^o	Standard Edition	DESlock+ Pro
Full Disk Encryption	-	-	-	✓
Removable Media Encryption	-	-	✓	✓
Deslock+ Go Portable Encryption	-	-	✓	✓
File & Folder Encryption	✓	✓	✓	✓
Email Encryption	✓	✓	✓	✓
Text & Clipboard Encryption	✓	✓	✓	✓
Virtual Disks & Encrypted Archives	✓	✓	✓	✓
Centralised Management Compatible	-	✓	✓	✓

A single install serves all four licence types. Upgrading is silent and automatic for managed users, unmanaged users simply enter an activation code.

^oEssential Edition is exclusive to ESET customers.

DESlock+ Mobile	FREE Mode	Managed Mode

System Requirements

Client & Server Side

Microsoft® Windows® 8, 8.1*
 Microsoft® Windows® 7
 Microsoft® Windows® Vista
 Microsoft® Windows® XP SP 3
 Microsoft® Windows® Server 2003 – 2012

* Microsoft Windows RT is not supported;
 Full Disk Encryption requires keyboard

Mobile Platforms

iOS

Certifications:

FIPS 140-2 level 1

Algorithms & standards:

AES 256 bit
 AES 128 bit
 SHA 256 bit
 SHA1 160 bit
 RSA 1024 bit

Server side

The **DESlock+** Enterprise server can manage users and workstations together or independently. Activation, and changes to security policy, software feature-set, encryption keys and endpoint status are all handled, securely through the cloud keeping your most high-risk endpoints under close control at all times. Home and mobile working make extending encryption security policy beyond the perimeter of your network a necessity. Only **DESlock+** offers full control wherever your users are.

Remote Central Management

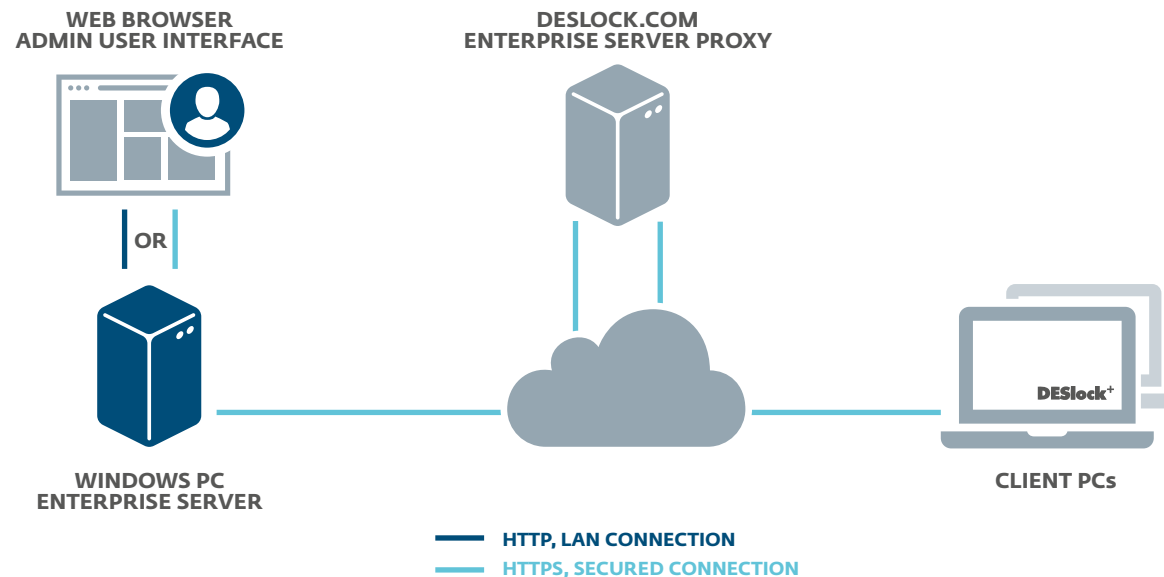

Manage any user or workstation with a standard internet connection
 All commands, updates, status requests and responses posted via the DESlock+ Enterprise Proxy
 No dependency on Active Directory or any existing server architecture installation
 Secure connectivity allows control of endpoint encryption keys, security policy and software features beyond the corporate security boundary
 Full remote management, creation and removal of user accounts

Encryption Key Management

Patent-pending technology
 Add or remove any or all encryption keys
 Change the encryption policy remotely and silently, without user interaction

Enterprise Server Proxy

By using the Enterprise Proxy as an intermediary, all connections from client and server are outgoing.
 All information is encrypted with either RSA or AES and the connection itself is SSL encrypted
 No need for own SSL certificate and additional hardware, network or firewall changes

ESET Technology Alliance aims to better protect businesses with a range of complementary IT security solutions. We provide customers with a better option when staying protected in the ever-changing security environment by combining our proven and trusted technology with other best-of-breed products. All members of the ESET Technology Alliance are carefully selected companies specializing on a specific IT security area.

By doing so we strive to achieve complementarity and synergy with our own products and services, providing simple, yet powerful solutions. In this way we aim to look after the growing security needs of our clients well into the future.
